Evaluation of Greenhouse Tomatoes

Spring Crop 1960

All varieties and lines were replicated 3 times with the exception of Purdue 91 and 110 which were single plots of 7 plants. Plot size - single row of 7 plants spaced 3' x 22". Seed for this trial was sown November 24, 1959, transplanted to 3" peat pots on December 4 and set in ground beds on January 12, 1960. Harvest period from April 11 to June 29, 1960. See Table 1.

Fall Crop 1960

Varieties and lines replicated 4, 3, and 2 times were seeded June 13, transplanted to 3" peat pots on June 21 and set in ground beds on July 31, 1960; harvest period from October 7, 1960 to January 7, 1961. Michigan State lines were seeded July 15, transplanted July 23, and set in ground beds on August 20, 1960; harvest period from November 10, 1960 to January 7, 1961. All spacing 3' x 22" in single row plots of 7 plants. This crop was removed early to permit re-laying of steam tile. See Table 2.
